The Stethoscope Song

Oliver Wendell Holmes, Sr. (1809–1894) is known as physician, author, poet, and father of Oliver Wendell Holmes, Jr., an Associate Justice of the U.S. Supreme Court for over 30 years. At Harvard Medical School in the early 1830s, Oliver Wendell Holmes and Austin Flint came under the influence of Dr. James Jackson, an early enthusiastic proponent of the Laennec stethoscope. Holmes turned from the clinical practice of medicine to academic pursuits and served Harvard Medical School as Professor of Anatomy and Physiology from 1847 to 1882 and as Dean from 1847 to 1853.

One can only surmise that, in an era of spreading enthusiasm for the stethoscope, Holmes penned the following poem with tongue in cheek. Yet there are obvious messages therein, even for us today.

The Stethoscope Song; a Professional Ballad

by Oliver Wendell Holmes (1848)

There was a young man in Boston town,
He bought him a stethoscope nice and new,
All mounted and finished and polished down,
With an ivory cap and a stopper too.

It happened a spider within did crawl,
And spun him a web of ample size,
Wherein there chanced one day to fall
A couple of very imprudent flies.

The first was a bottle-fly, big and blue,
The second was smaller, and thin and long;
So there was a concert between the two,
Like an octave flute and a tavern gong.

Now being from Paris but recently,
This fine young man would show his skill;
And so they gave him, his hand to try,
A hospital patient extremely ill.

Some said that his liver was short of bile,
And some that his heart was over size,
While some kept arguing, all the while,
He was crammed with tubercles up to his eyes.

This fine young man then up stepped he,
And all the doctors made a pause;
Said he, The man must die, you see,
By the fifty-seventh of Louis's laws.*

But since the case is a desperate one,
To explore his chest it may be well;
For if he should die and it were not done,
You know the autopsy would not tell.

Then out his stethoscope he took,
And on it placed his curious ear;
Mon Dieu! said he, with a knowing look,
Why, here is a sound that's mighty queer!

The bourdonnement is very clear,—
Amphoric buzzing, as I'm alive!
Five doctors took their turn to hear;
Amphoric buzzing, said all the five.

There's empyema beyond a doubt
We'll plunge a trocar in his side.
The diagnosis was made out,—
They tapped the patient; so he died.

Now such as hate new-fashioned toys
Began to look extremely glum;
They said that rattles were made for boys,
And vowed that his buzzing was all a hum.

There was an old lady had long been sick,
And what was the matter none did know:
Her pulse was slow, though her tongue was quick;
To her this knowing youth must go.

So fast their little hearts did bound,
The frightened insects buzzed the more;
So over all their chests he found
The \textit{râle sifflant} and the \textit{râle sonore}.

He shook his head. There's grave disease,—
I greatly fear you all must die;
A slight post-mortem, if you please,
Surviving friends would gratify.

The six young damsels wept aloud,
Which so prevailed on six young men
That each his honest love avowed,
Whereat they all got well again.

Now use your ears, all you that can,
But don't forget to mind your eyes,
Or you may be cheated, like this young man,
By a couple of silly, abnormal flies.

While Holmes's humor and satire are entertaining, there are some messages for us today, over 150 years later. “Mind your eyes,” he says. Yes, use more than one sense; “use your ears all you that can,” but keep your eyes open as well, “or you may be cheated, like this young man.” Austin Flint wrote as early as the 1850s that the cardiac physical exam included “percussion, palpation, auscultation and inspection.” This same message, in part, comes through in Holmes's poem. As we listen, there is much to be learned from our powers of observation and touch as well. Holmes's poem also cautions the user of new technology to be aware of its limitations. So while we are amused and entertained by Holmes's humor and satire, we should not fail to take heed of his more subtle messages.
